EXPERIENCE

E*TRADE *Jersey City, NJ*

Jan 2022 – Present (4 Years)

- Configured several Spring Batch jobs to process high-volumes of data on all tradeable companies and market events
- Designed a fault-tolerant distributed system of batch app nodes, ensuring a “standby” node turns “active” during a crash
- Optimized the processing of options data by implementing multi-threaded concurrency, reducing processing time by 4x
- Collaborated with 3 client platform teams to deliver customer-facing data via a Spring Boot REST API
- Built an internal UI to interface our financial instrument DBs, making it easier to run complex SQL across several tables
- Added monitoring of our data vendor directories to ensure on-time arrival of files and raise alarms for missing files

Java · XML · Spring Boot · Spring Batch · Spring Security · Oracle Database · CyberArk · Prometheus · React · Python · Jenkins CI/CD

State Farm *Bloomington, IL*

Jan 2019 – Dec 2021 (2 Years)

- Maintained and enhanced Spring Boot API microservices for querying customer insurance data
- Developed extensive unit tests for Java code and API endpoints and configured CI/CD pipelines
- Wrote scripts to redact sensitive data from call transcriptions for use in sentiment analysis
- Recreated the popular ad “Attacking Buffaloes” in VR to showcase a new medium for training insurance agents

Java · Spring Boot · JUnit · Karate · Python · Unity · C# · Blender

Hack4Impact *Champaign, IL*

Jan 2018 – Dec 2020 (2 Years)

- Had the privilege of being in a student-led organization building robust software to advance social good
- Mentored 5-8 new members each semester in React frontend development and version control in GitHub
- Built a centralized virtual resource hub that equalizes/promotes information access to immigrants in Champaign ([link](#))
- Developed a mobile app that gives students location-based notifications on crime, transportation, and more ([link](#))

React · Flask · MongoDB

PROJECTS

Pug It Up!

Solo developing a mobile game (level design, art, animation) in which the player is a pug that goes up. Employed procedural generation for level uniqueness and a depth-first-search algorithm to find the most optimal path to victory. ([link](#))

Unity · C# · Krita

HugMatch Earth

Volunteering as a developer for a game designed for kids to learn about global warming through multi-sensory interaction. Working closely with designers to make mock-ups come to life and hosting live demos for user research. ([link](#))

Unity · C# · Figma

EDUCATION

**The University of Illinois at
Urbana-Champaign**

B.S. Computer Science + Linguistics

2017 – 2020
